GIVING BACK

CHALLENGE

I was referred to Kid Ventures by their banker and they wanted to capitalize on SBA financing to increase the Assets of their company as well as secure a location in 4S ranch submarket. Their goal was to combine their corporate office with a retail location and needed a unique zoning to accomplish their objective.

STRATEGY

- Determine ideal location that provided the correct zoning.
- Research demographics and available product inventory for an available property that would achieve their objective
- Identify a property with existing income in place to help offset their occupancy costs.

RESULTS

We identified an ideal property that was slightly above their price range but were able to capitalize on Seller financing, the income of a tenant in 40% of the building and the Seller providing a “turn-key” solution for the tenant improvements required to make the acquisition possible for Kid Ventures.
